RESEARCH EXPERIENCE

Multiword expressions and the lexicon

[syntax, semantics]

- OVERVIEW:** My D.Phil. thesis ([1]) gives an analysis of multiword expressions (MWEs), especially idioms. It argues against approaches which conceive of idioms like *spill the beans* as being made up special versions of *spill* and *beans*, and in favour of approaches which reaffirm the mixed nature of MWEs as partially word-like and partially phrase-like. It then develops a concrete example of the latter kind of theory, integrating insights from Tree-Adjoining Grammar into the Lexical Functional Grammar architecture.
- OUTCOMES:** I have presented this work at peer-reviewed conferences for computational linguists ([16]), theoretical syntacticians ([14]), and for more general linguistics audiences ([12]). The work has also appeared in the proceedings of two of these conferences ([6], [7]). I have also organised a collaboration with researchers at the Goethe-Universität Frankfurt am Main, where I conducted a research visit in June 2018.
- FUTURE WORK:** I have a number of psycholinguistic experiments planned to test the validity of certain theoretical claims, and also intend to delve more deeply into the semantic properties of idioms. Sascha Bargmann, Manfred Sailer and I are developing a semantic theory of the ‘extended’ use of idioms, exemplified in e.g. *Once this cat is out of the bag, a lot of people are going to get scratched*, where the underlying metaphor is used to make sense of a figurative continuation ([9], [10], [19], [22]). I ultimately plan to synthesise these findings with my thesis work into a book.

Honorification in Korean

[pragmatics]

- OVERVIEW:** Yoolim Kim and I have been developing a formal account of honorification in Korean. Little attention has been paid to how the *target* of honorification (the honoured one) is identified, and we give a novel analysis of this problem.
- OUTCOMES:** We have presented this work at the annual meeting of the LAGB ([13]) and at LangUE, a postgraduate student conference at the University of Essex ([15]), as well as at a number of informal venues.
- FUTURE WORK:** We intend to submit an article to the *Journal of Pragmatics* in the near future.

Discourses of homosexuality

[sociolinguistics, corpus linguistics]

- OVERVIEW:** I conducted a short research project using corpus linguistic and critical discourse analysis tools to examine the UK House of Lords debates on same-sex marriage in 2013. This contributed to a growing literature both on debates around same-sex marriage legislation and also on implicit homophobia.
- OUTCOMES:** My findings were reported at the IGALA conference in 2014 ([18]) and published in the *Journal of Language and Sexuality* ([3]).
- FUTURE WORK:** I would like to continue this research by examining parliamentary debates from other countries where discursive norms differ in interesting ways, such as the focus on family values and religion in Uganda or the USA.

TEACHING

I have taught **syntax, semantics & pragmatics, sociolinguistics, psycholinguistics**, and **general linguistics** at both the introductory and advanced undergraduate level. At the graduate level, I have TA-ed classes in **syntax, phonology**, and **formal foundations of linguistics** (an introduction to set theory, logic, and formal language theory for linguists). This teaching experience covers small group and tutorial settings, larger classes, and lectures, including designing tutorial courses and lecture series. I hold a SEDA-PDF Supporting Learning award (see above).
